

CONSISTENT BIOPROCESS DEVELOPMENT

New Expression Systems
and Technologies

Symposium

March 1, 2013
10:00 - 17:30

Technische Universität Berlin

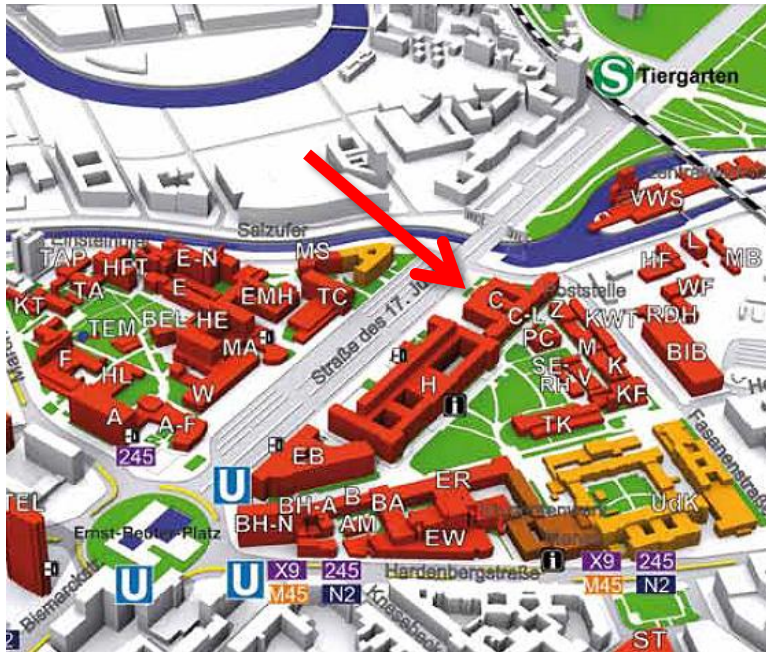

Consistent Bioprocess Development - New Expression Systems and Technologies

PROGRAMME	March 1, 2013	14:00 - 14:30	Expression of biosynthetic assembly lines in <i>E. coli</i> for the synthesis of tailored peptides Roderich Süßmuth <i>Chair of Biological Chemistry</i> <i>Technische Universität Berlin, Germany</i>
10:00 - 10:30	Adress of welcome and introduction Peter Neubauer <i>Chair of Bioprocess Engineering</i> <i>Technische Universität Berlin, Germany</i>	14:30 - 15:00	Advanced cell engineering: Making very large proteins and keeping them active - example Valinomycin Jian Li <i>Chair of Bioprocess Engineering</i> <i>Technische Universität Berlin, Germany</i>
10:30 - 11:00	Peptide expression in <i>Bacillus halodurans</i> - strain and secretion system engineering Michael Crampton <i>CSIR, Pretoria, South Africa</i>	15:00 - 15:30	<i>Aspergillus niger</i> : a cell factory with unlimited prospects Benjamin Nitsche <i>Chair of Applied and Molecular Microbiology</i> <i>Technische Universität Berlin, Germany</i>
11:00 - 11:30	Microbial production of novel biologics using secretory <i>E. coli</i> strains Guido Seidel <i>Wacker Biotech GmbH, Jena, Germany</i>	15:30 - 16:00	Coffee break
11:30 - 12:00	Creating novel metabolic routes - example TCP Pavel Dvorak <i>Masaryk University, Brno, Czech Republic</i>	16:00 - 16:30	New high throughput approaches Andreas Knepper <i>Chair of Bioprocess Engineering</i> <i>Technische Universität Berlin, Germany</i>
12:00 - 12:30	Controlled growth strategies Antje Neubauer <i>BioSilta Europe GmbH, Berlin, Germany</i>	16:30 - 17:00	Mechanism recognition and new ways for biotechnological process control Nico Cruz <i>Chair of Bioprocess Engineering</i> <i>Technische Universität Berlin, Germany</i>
12:30 - 13:30	Lunch break	17:00 - 17:30	Introducing non-natural amino acids into proteins Nediljko Budisa <i>Chair of Biocatalysis</i> <i>Technische Universität Berlin, Germany</i>
13:30 - 14:00	New Expression systems for Bacillus based processes Thomas Schweder <i>Ernst-Moritz-Arndt-Universität-Univ. Greifswald, Germany</i>		

GENERAL INFORMATION

The expression of recombinant proteins is a standard technology. Despite this, still often the developmental success to produce a protein in high yield and quality is often unsatisfying and takes a lot of labor and time. The symposium „New Expression Systems and Technologies“ in the series Consistent Bioprocess Development is directed to these challenges and discusses new expression systems and strategies as a base for a systematic and successful developmental project.

DIRECTIONS

VENUE:

*Technische Universität Berlin, Germany
Department of Chemistry
Straße des 17. Juni 115
Room C130*

CONTACT:

*Prof. Dr. Peter Neubauer
Technische Universität Berlin
Chair of Bioprocess Engineering
Tel.: +49 30 314 72269
E-Mail: peter.neubauer@tu-berlin.de*

REGISTRATION:

*Technische Universität Berlin
Innovation Center Technologies for
Health and Foods IGE
E-Mail: info@iqe.tu-berlin.de
Registration Code: Expression
Fax: +49 30 314 76664*
